

The Face of Modern Battle

6.0 LEADERSHIP ACTIONS

6.1 The number of leadership actions is based on the leader's rank and quality and is represented by a leadership card. To give another action to a soldier, the following conditions must apply:

- The CO/NCO/Commander has authority over that soldier or crew member (see **3.0**)
- The soldier is within ZC (see **4.0**).
- The leader has line of sight (LOS) to the soldier.

6.2 A leader cannot give their leadership actions to himself. A leader can give an action to another leader that is under his authority. The actioned leader can perform any action including a self rally.

6.21 The leadership card is not used to determine when a leader can perform normal actions (moving, combat, self rally, etc.). These types of actions are done on the leader's normal soldier action.

6.3 A leader that is broken or pinned may not use leadership actions.

6.4 A leadership card is a special card in the deck used to represent leadership actions. One leadership card is placed in the deck for each leadership action (e.g. a CO with 3 leadership actions will have 3 leadership cards). Record the leader's Unit ID in the box on the card. When a leadership card is drawn, the CO, NCO or vehicle commander indicated on the card can give an action to another soldier.

Leader Example

An exceptional Captain will have a ZC of 16" (for 20mm), seven leadership actions (5 + 2), and a leadership quality rating of -20.
